

Restaurant Website Requirements

Act as an expert Full-Stack Software Architect. Write a complete, production-ready, mobile-responsive Restaurant Management System for "Sri Vijaya Durga Family Restaurant" using React.js, Tailwind CSS, and Framer Motion.

The application must be architected as a Single Page Application (SPA) with three distinct, fully functional, interlinked routing sections powered by a centralized React Context state hub (`src/context/AppContext.jsx`) to handle live data flow without requiring a physical backend database.

The theme color must strictly be Royal Maroon (#8B0000) and Secondary color Golden Saffron (#D4A017) with fluid parallax scrolling animations, floating spices, and smooth section transitions.

Implement the three main sections together but separated via architectural layout views:

1. CUSTOMER PORTAL (`src/pages/CustomerPortal.jsx`):

- Accessible instantly via QR-routing (e.g., URL parameters query `?table=1` up to `?table=10`) with NO user login or registration allowed.
- Displays a premium, cinematic Hero welcome section, an interactive floor plan map to check table status, and a detailed menu displaying items categorized into: Veg Biryani, Non-Veg Biryani, Veg Starters, Non-Veg Starters, Seafood Starters, Veg Curries, Non-Veg Curries, Roti Basket, Soups, and Family Packs.
- Includes a live order tray (Cart) that displays itemized receipts adding CGST/SGST (5%) automatically.
- Clicking 'Place Order' must immediately broadcast the order package to the global context state array without clearing data or failing.
- Features a mock UPI QR Scanner success verification screen for immediate client settlement.

2. KITCHEN KANBAN DASHBOARD (`src/pages/KitchenDashboard.jsx`):

- A live operational screen designed for kitchen display systems (KDS).

- Automatically listens to the global context order queue array.
- Renders incoming order cards sorted chronologically, showing Table Number, ordered items, item quantities, and special notes.
- Each order card must contain a step-by-step progress advancement pipeline: [Order Placed] -> [Preparing] -> [Ready] -> [Served]. Clicking the button must advance the order's status instantly.

3. ADMINISTRATIVE OPERATIONS CONTROL (`src/pages/AdminDashboard.jsx`):

- A secured management interface (protected by a simple admin authorization modal gate).
- Includes an live analytical dashboard reporting: Cumulative Daily Gross Revenue, Active Table Occupancy map (Table Statuses: Green for Available, Yellow for Reserved, Red for Occupied), and total completed Dispatched Parcel volume.
- Contains a Master Bill Management panel listing historical completed receipts with an explicit action button: "Settle Bill & Release Table". Clicking this action must instantly mark the target order as "Completed" and automatically flip the associated Table status back to "Green/Available" across the entire app.

Provide the complete clean directory folder structure, full implementation of the central AppContext manager, and clean modular component UI screens using Lucide-React icons.

1. Restaurant Information

- Restaurant Name: Sri Vijaya Durga Restaurant
- Owner Name: Udarapu Navaneeth
- Address: Beside TTD Kalyana Mandapam,

Vijaya talkies Road, Nandigam

- Contact Number: 9966315544
- WhatsApp Number: 9030121200
- Google Maps Location Link:
https://maps.app.goo.gl/qAypkmgzgzzxfD6ND8?g_st=aw

2. Branding

- Logo:
- Theme Color: #8B0000 (Royal Maroon)
- Secondary Color: #D4A017 (Golden Saffron)
- Tagline: "Tradition in Every Bite"
- 3. Homepage Hero Section
- Restaurant Background Image: Home Section: Cinematic restaurant interior with warm lighting, happy families dining, subtle floating spice particles.
- About Section: Chef cooking live, flames from kitchen, fresh ingredients animation.
- Menu Section: Dynamic food showcase.
- When user selects Biryani, a high-quality biryani image/video smoothly appears in the background.
- When user selects Chicken Curry, the background transitions to chicken curry visuals.
- When user selects Desserts, dessert visuals appear.
- Selected food item should animate from menu card to background with smooth zoom/parallax effect.
- Table Booking Section: Elegant restaurant seating layout with animated tables and booking highlights.
- Order Tracking Section: Background changes based on order status:
- Order Placed → Chef preparing food.
- Preparing → Cooking animation.
- Ready → Fresh food served on tray.
- Completed → Happy customer dining.
- Payment Section: Premium payment-themed background with QR scanner animation and secure payment effects.
- Contact Section: Restaurant exterior view with location/map animation.
- Advanced Animations:
- Smooth section-to-section transitions.

- Parallax scrolling effects.
- Floating spices and food particles.

Hover effects on menu cards.

Food item image expands into hero background on click.

Background images change with fade and zoom transitions (not instant replacement).

Mobile and desktop optimized.

- Welcome Message:

"Welcome to Sri Vijaya Durga Family Restaurant – Where Taste Meets Tradition."

- Restaurant Description:

"Experience authentic Indian flavors, signature biryanis, fresh ingredients, and exceptional hospitality in a warm family-friendly environment. Every dish is crafted to create memorable dining moments."

4. About Us Section

- Restaurant History: _____
- Special Features: _____
- Opening Year: _____

5. Menu Section

COMPLETE MENU GENERATION PROMPT

Create a premium, modern, mobile-first restaurant QR Menu page.

The menu contains 114 dishes. For EVERY dish listed below, create:

Exact dish name

Exact price

Category

Veg / Non-Veg label

High-quality matching food image

Short professional food description (15–25 words)

Menu card with hover animation

Add to Cart button

Quantity controls

Responsive layout

Use realistic food images that accurately match each dish.

Design Requirements

Restaurant luxury theme

Full-screen hero section

Smooth scroll animations

Floating spice particles

Gradient animated background

Glassmorphism cards

Hover lift effect

Framer Motion animations

Sticky category navigation

Search functionality

Mobile-first responsive design

Fast image loading

Modern typography

Dark and Light mode support

Generate production-ready React + TypeScript + Tailwind CSS code and create menu cards for every listed item using the exact prices above.

Food Images (Mandatory)

For every menu item, automatically assign a high-quality, realistic food image that accurately matches the dish name.

Requirements:

Do NOT use placeholder images.

Use dish-specific images.

If an exact image is unavailable, use the closest visually matching dish.

Images should be restaurant-quality and professional.

Use lazy loading and optimized image delivery.

Display images in 16:9 aspect ratio.

Add subtle zoom-on-hover effect.

Add image skeleton loaders while loading.

Ensure every one of the menu items has its own suitable image.

Examples:

Veg Biryani → Authentic Hyderabadi Veg Biryani image

Paneer Biryani → Paneer Biryani image

Mushroom Biryani → Mushroom Biryani image

Chicken Dum Biryani → Dum Chicken Biryani image

Chicken 65 → Spicy Chicken 65 image

Chicken Majestic → Andhra Chicken Majestic image

Apollo Fish → Apollo Fish image

Chilli Fish → Indo-Chinese Chilli Fish image

Prawns Fry → Crispy Fried Prawns image

Egg Bhurji → Indian Egg Bhurji image

Paneer Tikka → Tandoori Paneer Tikka image

Malai Kebab → Creamy Malai Kebab image

Store image URLs in the menu data structure:

```
{  
  id: string,  
  name: string,  
  category: string,  
  price: number,  
  type: "veg" | "non-veg",  
  image: string,  
  description: string  
}
```

Premium Background Animations

Create elegant, lightweight restaurant-themed animations.

Hero Section

Animated food-themed gradient background

Floating spice particles

Floating herbs and ingredient silhouettes

Slow-moving light effects

Parallax hero image

Entire Page Background

Subtle animated gradient
Soft blur blobs
Floating spice dust effect
Gentle ambient movement
Menu Cards
Hover lift animation
Smooth shadow transitions
Scale effect (1.03)
Glassmorphism effect
Fade-in on scroll
Category Sections
Reveal animation when entering viewport
Smooth staggered card animations
Animated category headers
Performance Rules
Use Framer Motion
60fps animations
GPU accelerated transforms
No heavy particle libraries
Mobile optimized
Visual Style

Theme: Premium Fine-Dining Restaurant

Colors:

Primary: #D62828;

Secondary: #F77F00;

Accent: #FCBF49;

Background: #FFF8F0;

Text: #222222;

Card: #FFFFFF;

Effects:

Glassmorphism

Soft shadows

Elegant gradients

Luxury typography

Modern spacing

Smooth transitions

Final Output Requirements

Generate:

React + TypeScript code

Tailwind CSS styling

Framer Motion animations

Complete menuData.ts containing all listed dishes with exact prices

Unique descriptions for every dish

Suitable image URL for every dish

Search functionality

Category filters

Sticky navigation

Add-to-cart functionality

Quantity controls

Dark mode support

Mobile-first responsive layout

Do not use placeholder data. Use all menu items listed above, preserve exact prices, assign suitable food images for every dish, and include premium restaurant-style animated backgrounds throughout the application.

6. Parcels & Takeaway

Section Title:

"Freshly Packed, Delivered with Care"

Section Description:

Enjoy your favourite dishes at home with our quick and hygienic parcel service. Order online or by phone and get freshly prepared food packed securely for takeaway or delivery.

Parcel Categories

Couple Packs (Parcel Only)

- Chicken Dum Biryani – ₹360
- Chicken Fry Biryani – ₹370
- Chicken B/L Fry Biryani – ₹400
- Chicken Wings Biryani (Dry) – ₹380
- Chicken Wings Biryani (Semi Gravy) – ₹400
- Chicken Lollipop Biryani – ₹400
- Mutton Biryani – ₹500
- Prawns Biryani – ₹460

Family Packs

- Family Dum Biryani – ₹630
- Family Fry Biryani – ₹650/700
- Family Wings Biryani (Dry) – ₹700
- Family Wings Biryani (Semi Gravy) – ₹740

- Family Lollipop Biryani – ₹740
- Family Special Biryani – ₹700
- Family Prawns Biryani – ₹750

Bucket Biryani (Parcel Only)

- Chicken Dum Biryani – ₹700
- Chicken Fry Biryani (Bone/B.L) – ₹750/800
- Chicken Wings Biryani (Dry) – ₹770
- Chicken Wings Biryani (Semi Gravy) – ₹830
- Chicken Lollipop Biryani – ₹830

Parcel Features

- Hygienic Packaging
- Freshly Cooked Food
- Fast Preparation (15–20 Minutes)
- Live Order Tracking
- Pickup & Delivery Available
- Secure Online Payments

Dynamic Background Requirement

When users open the Parcel section:

- Show delivery riders, takeaway bags, packed biryani buckets, and steaming food.
- Animate food boxes being packed by chefs.
- Display moving delivery bikes and parcel preparation effects.
- Clicking a parcel item should show that dish as a full-screen animated background.

This will make the Parcel section look much more professional than simply listing parcel items under the

7. Table Booking System

- Total Tables: 10

- Number of Seats Per Table: choice
- Booking Time Slots: choice
- Green Colour = Available Tables
- Yellow Colour = Reserved Tables
- Red Colour = Occupied Tables

8. QR Menu System

- QR Code for Digital Menu: _____
- Menu PDF Link: _____

9. Food Ordering System

Order Status:

- Order Placed
- Preparing
- Completed

Customer Details:

- Name
- Mobile Number
- Table Number

10. Payment Section

- UPI QR Image: _____
- UPI ID: _____
- Accepted Payment Methods:
 - o UPI
 - o PhonePe
 - o Google Pay
 - o Paytm
 - o Cash

11. Billing Section

Bill should include:

- Table Number
- Ordered Items
- Quantity
- Price
- GST
- Grand Total

After successful payment:

- Generate Bill
- Mark Order as Completed
- Automatically Free the Table

12. Gallery Section

Upload:

- Restaurant Front Image
- Dining Area Images
- Kitchen Images
- Food Images

13. Customer Reviews

- Customer Name
- Rating
- Review Message

14. Contact Section

- Address
- Phone Number
- WhatsApp Button
- Google Maps Embed

15. Admin Dashboard

Only Admin can:

- Add/Edit/Delete Menu Items

- Update Prices
- View Bookings
- View Orders
- View Payments
- Generate Reports
- Manage Tables

15. AI Animations

- Smooth page transitions
- Scroll animations
- Food image hover effects
- Animated counters
- Floating booking button
- Animated menu cards
- Loading screen animation

16. Technical Requirements

- Responsive Design (Mobile + Desktop)
- Modern UI/UX
- Fast Loading
- SEO Friendly
- PWA Support
- Dark Mode
- Backend Database
- QR-Based Ordering System
- Real-Time Table Status Updates
