

PAYMENT SCANNER SECTION:

Payment & Billing Workflow (Mandatory)

Customer Order Flow

Customer books a table.

Customer places the order from the menu.

Order is automatically sent to the Kitchen Dashboard.

Kitchen staff can update order status:

Order Received

Preparing

Prepared

Once marked as "Prepared", the order is moved to the Waiter Dashboard.

Waiter marks:

Serving

Served

After the customer finishes dining, the order status changes to:

Ready for Billing

Billing & Payment Section

After the order reaches Ready for Billing, display a dedicated payment page/modal containing:

Bill Summary

Order ID

Table Number

Customer Name

Date & Time

List of Ordered Items

Quantity

Price per Item

Taxes (if applicable)

Grand Total

QR Code Payment

Display my payment QR code prominently.

Placeholder:

Payment QR Image: [UPLOAD_MY_QR_CODE]

State Bank of India - 7402

UPI ID: 9030121200-2@ybl 

 Download

 Share

UPI ID: [MY_UPI_ID] : 9030121200-2@ybl

Payment section should include:

Scan QR to Pay

UPI ID copy button

Amount displayed clearly

Payment instructions

Payment Confirmation

After payment:

Customer clicks "I Have Paid"

Restaurant staff/Admin verifies payment

Payment status changes to:

Pending Verification

Verified

Completed

Only after verification should the order be marked as fully completed.

Invoice & Receipt Generation

After successful payment, automatically generate a professional invoice containing:

Invoice Details

Restaurant Name

Restaurant Logo

Address

Contact Number

GST Number (Optional)

Invoice Number

Customer Name

Table Number

Date & Time

Ordered Items

Quantity

Price

Tax

Grand Total

Payment Method (UPI)

Payment Status

Download Options

Provide buttons for:

Download Receipt (PDF)

Download Invoice (PDF)

Print Invoice

Print Receipt

Share Invoice

Download Bill as PDF

All PDFs should be professionally designed and mobile-friendly.

Admin Controls

Admin should be able to:

Upload/Change QR Code anytime

Change UPI ID anytime

View payment history

Verify customer payments

Re-download any invoice

Search invoices by:

Order ID

Customer Name

Date

Table Number

Customer Rating System

After payment completion, automatically show:

Rate Your Experience

★ 1–5 Star Rating

Food Quality

Service Quality

Ambience

Optional Feedback Comment

Store ratings in the Admin Dashboard and display average restaurant rating on the website homepage.

UI/UX Requirements

Modern animated payment page

QR code displayed in a premium card design

Success animation after payment verification

Real-time order status tracking

Mobile responsive

Dark and Light mode support

Smooth transitions and notifications for every order status change

This payment workflow must be fully integrated with the Table Booking System, Customer Ordering System, Kitchen Dashboard, Waiter Dashboard, and Admin Dashboard so the entire restaurant process works end-to-end.
