

RESTAURANT GALLERY SECTION:

Create a premium and visually attractive Restaurant Gallery Section that showcases my uploaded restaurant images in a modern, dynamic, and responsive layout.

Gallery Requirements

Use only the restaurant images uploaded by me.

Automatically optimize image sizes for desktop, tablet, and mobile devices.

Display images inside modern cards with:

Rounded corners (15px–25px border radius)

Soft shadows

Glassmorphism effects where suitable

Premium restaurant-themed styling

Dynamic Layout

Use a Pinterest-style masonry layout or modern grid layout.

Cards should have varying heights for a more dynamic appearance.

Images should not appear in a simple static grid.

Create an elegant and premium visual flow throughout the gallery.

Animations

Add smooth and subtle animations such as:

Fade-in animation when the section enters the viewport.

Slight slide-up animation while scrolling.

Gentle zoom effect on hover.

Smooth card lift effect on hover.

Soft image scaling transitions.

Staggered loading animations for gallery cards.

Smooth reveal effects when scrolling through images.

Animations should feel premium and professional, not excessive.

Interactive Features

When a user clicks any gallery image:

Open a full-screen lightbox/modal.

Display the image in high resolution.

Add smooth opening and closing animations.

Include:

Previous Image button

Next Image button

Close button

Swipe support on mobile devices

Background Effects

Add subtle floating decorative elements.

Soft parallax effects while scrolling.

Elegant gradient overlays where appropriate.

Maintain excellent readability and performance.

Gallery Categories (Optional)

Allow Admin to categorize images:

Restaurant Interior

Dining Area

Family Section

Food Specials

Kitchen

Events & Celebrations

Users can filter images by category with smooth transitions.

Admin Controls

Admin Dashboard should allow:

Upload new gallery images.

Delete gallery images.

Edit image categories.

Reorder gallery images via drag-and-drop.

Set featured images.

Manage gallery without editing code.

Performance Requirements

Lazy-load images.

Optimize image loading speed.

Maintain high quality while reducing file size.

Ensure smooth animations on mobile and desktop.

Design Goal

The gallery should feel like a premium restaurant showcase, with elegant curved cards, subtle animations, smooth interactions, and a modern dynamic layout that highlights the restaurant's atmosphere and dining experience
