Project Overview

Build a complete Restaurant Table Booking, Ordering, Billing, and Management Web Application for **Sri Vijaya Durga Restaurant**.

The system must not require Login or Registration for customers.

The application should be fast, modern, responsive, mobile-friendly, and suitable for restaurants, cafes, food courts, and dining establishments.

UI / Design Requirements

Homepage Hero Section

Restaurant Name:

Sri Vijaya Durga Restaurant

Hero Background:

Use the best suitable restaurant-themed background consisting of:

- Restaurant Interior
- Dining Tables
- Food Collage
- Blurred Spices Pattern

AI should automatically choose the most professional background image.

Homepage Features:

- Hero Banner
- Restaurant Introduction
- Featured Menu Section

- Table Booking CTA
 - Contact Information
 - Responsive Design
-

Website Pages

1. Home Page

Sections:

- Hero Banner
 - About Restaurant
 - Featured Food Items
 - Book Table Button
 - QR Menu Information
 - Contact & Location
 - Footer
-

2. Table Booking Page

Restaurant-themed background.

Features:

- Display all tables visually.
- Each table should have a unique number.

Examples:

- Table 1
- Table 2
- Table 3
- Table 4
- Table 5
- etc.

Table Status Colors

● Green = Available

● Yellow = Ordered / Billing Pending

● Red = Occupied

Features:

- Cinema-seat-style table selection.
- Click available table.
- Reserve table instantly.
- Real-time status updates.
- Search tables.
- Filter tables.

When table is reserved:

- Status changes Green → Red.
- Customer proceeds to menu.

QR Menu System

Each table should have a unique QR Code.

Examples:

Table 1 QR:

<https://restaurant-domain.com/menu?table=1>

Table 2 QR:

<https://restaurant-domain.com/menu?table=2>

Table 3 QR:

<https://restaurant-domain.com/menu?table=3>

Requirements:

- Generate unique QR for every table.
- Support uploaded menu PDF.
- Open digital menu when scanned.
- Detect table number automatically.

Digital Menu Page

Menu Categories:

Starters

- Image
- Description
- Price

Main Course

- Image
- Description
- Price

Beverages

- Description
- Price

Features:

- Add to Cart
- Quantity Controls
- Search Food
- Category Filters

- Mobile Friendly Layout
-

Food Ordering System

Customers place orders directly from QR Menu.

Order Lifecycle:

Stage 1

Order Placed

Stage 2

Preparing / Pending

Stage 3

Completed / Ready

Kitchen Dashboard should allow status updates.

Real-time updates required.

Kitchen Management Dashboard

Features:

- View Incoming Orders
- Update Order Status
- Mark as Preparing
- Mark as Completed
- Filter Orders

Filters:

- Placed
 - Preparing
 - Completed
-

Payment Module

After order completion:

Show Bill Summary.

Display QR Payment Options:

- UPI
- PhonePe
- Google Pay
- Paytm

Features:

- Dynamic Amount Calculation
- Tax Calculation
- Service Charge Calculation
- Payment Confirmation

Billing System

Generate Invoice Automatically.

Invoice Must Include:

- Invoice Number
- Table Number
- Ordered Items
- Quantity
- Item Price
- Subtotal
- Tax
- Service Charges
- Total Amount
- Payment Status
- Date
- Time

Features:

- Download Invoice PDF
- Print Invoice
- Reprint Invoice

Automatic Table Release

After:

1. Payment Success
2. Invoice Generated

System automatically:

- Releases table.
- Updates status.

Status Change:

Red / Yellow → Green

Table becomes available again.

Admin Dashboard

Dashboard Statistics

Display:

- Total Tables
- Available Tables
- Occupied Tables
- Pending Tables
- Orders Today
- Revenue Today
- Revenue This Week
- Revenue This Month

Order Monitoring

Live Orders View

Filters:

- Order Placed
 - Preparing
 - Completed
-

Table Monitoring

Real-Time Table Tracking

Color Indicators:

 Available

 Pending

 Occupied

Reports & Analytics

Generate:

- Daily Sales Report
- Weekly Sales Report
- Monthly Sales Report
- Top Selling Items
- Revenue Charts
- Table Utilization Report

Export:

- PDF
 - Excel
-

Additional Features

- Responsive Design
- Mobile Friendly

- Tablet Friendly
- Desktop Friendly
- PWA Support
- Install as Mobile App
- Offline Support
- Real-Time Updates
- QR-Based Ordering
- Fast Billing
- Search & Filters
- Order History
- Printable Invoices
- Dark Mode
- Modern Restaurant UI
- Smooth Animations
- Toast Notifications

Recommended Tech Stack

Frontend:

- Next.js 15
- React 19
- TypeScript
- Tailwind CSS
- ShadCN UI
