

Sri Vijaya Durga Restaurant - Complete Restaurant Management & Ordering System

Generate a complete production-ready Full Stack Restaurant Management Website with modern UI, responsive design, secure authentication, real-time ordering system, kitchen dashboard, admin portal, billing system, rating system, and table management.

Technology Stack

Frontend:

- React.js / Next.js
- Tailwind CSS
- Framer Motion Animations

Backend:

- Node.js
- Express.js

Database:

- MongoDB

Authentication:

- JWT Authentication
- Bcrypt Password Hashing
- Role-Based Access Control

Realtime:

- Socket.IO
-

Dynamic Background Images

Background image should automatically change based on selected section.

Examples:

Home → Restaurant Ambience

Menu → Food Images

Parcel → Delivery Images

Contact → Restaurant Interior

Gallery → Restaurant Photos

Use smooth animated transitions.

Menu Section

Display all menu items provided in menu sheet.

Every menu item must contain:

- Dish Image
- Dish Name
- Description
- Category
- Price

Display as attractive cards.

AI Generated Images

If menu images are unavailable:

Generate realistic AI food images automatically.

Dish Popup

When customer clicks dish card:

- Fullscreen image popup
 - Background blur
 - Smooth zoom animation
 - Elegant transition effects
-
